

Product sheet

KNCX

The future of tying machines is here. It's **electric**, **connected** and **modularized**.

New technology - KNCX

Next level performance

An innovative design with patent pending solutions will increase your bundle quality and maximize machine availability.

Increased energy efficiency

Save 70-90% of the energy costs generated by your current hydraulic tying machine.

Predictive maintenance

Utilize historical data to perform predictive maintenance and prevent production loss.

Exchange service

Utilize the modular structure of the machine to quickly and easily exchange modules in need of maintenance - the modules can be maintained in your own workshop or sent to a Sund Birsta service center.

Remote support

Utilize the full know-how of our specialists in Sweden with remote connectivity.
