Wire Descaler

The way to less downtime

Benefits with the wire descaler

There are many benefits with installing the wire descaler.

- No scale build up that is blocking the machine movement.
- No increase wear on parts in the machine that is in contact with the wire.
- No scale in the way that can cause problems when binding wire.

The Sund Birsta Descaler fits directly on our wire magazine. It can easy be installed on all kind of magazines.

The descaler bends the wire in a controlled way directly after the binding coil. This means that the scales falls down on the floor and the amount of scale that goes into the machine is minimal.
