Water Cooler Kit

Introducing the Sund Birsta Water Cooler Kit for Hydraulic system — your solution for minimizing machine downtime and maximizing productivity. Our water cooler kit is tailored specifically for your machine, ensuring a seamless fit and hassle-free installation to keep optimal oil temperature in warm application.

Key features:

- Custom Fit: Each kit is individually assembled in our workshop, based on the specifications and example pictures of your machine, guaranteeing compatibility and ease of installation.
- Quick Installation: The swap can typically be completed in few hours by just 1-2 mechanics in case where you have prepared with cooling water into the machine.
- Comprehensive Components: The kit includes all necessary item on machine to keep good performance on oil temperature. The only thing you must do is to prepare a pipe with colling water.
- Reduce your machine's downtime and enhance its operational efficiency with the Sund Birsta Water Cooler Kit — designed for quick, effective upgrade and long-lasting performance of the machine.
- Key data for a long-life machine: Oil temperature max. 60 degrees in hydraulic system.
- Key data for colling water: Max temp in 35°, min. flow 10 LPM, min. pressure 1 bar, max. pressure 30 bar and max. particle size in the cooling water 0,46x0,46 mm.
