

Product sheet

Press Plates

Equip your compactor with customized wear material for your press plate surface according to your need.

Improving your productivity

The press plates of our PCH compactors are equipped with steel wear plates as standard. This can, depending on your produced product properties create an increased wear on the wear plates or damage your product during compacting.

Equip your compactor with customized wear material for your press plate surface according to your need such as Hardox, Polymer, or Cast iron.
